What is it?

- Self-balancing vehicle
- First prototype: Jan 2002
- Can go up to 38km
- Two versions: i2 SE, x2 SE
- Indoor/outdoor/off-road

Different uses

- Personal purposes
- Tours
- Events
- Promotion
- Law enforcement and security

Negative points:

- « Oxboard » competitor
- Durability of the battery
- Segway driver card
- Legal age
- Costs
- Not allowed everywhere

Application to tourism

- Used in resorts and theme parks
- City tours
- Increasing visitors in mountain resorts
- Good promotion tool

Future and conclusion

- Prototype of bicycles and small cars
- Wheelchairs
- Growing market

What about you?

Have you ever tried a Segway?

What do you think?
